Q2 ⇒ write a Program to hide and show the Paragraph content on the button click using jQuery.

Ans ⇒

```html
<!DOCTYPE html>
<html>
<head>
<script
Src="https://ajax.googleapin.com/ajax/libs/jquery/3.5.1/jquery.min.js">
</script><script>
$(document).ready(function(){
    $("#hide").click(function(){
        $("p").hide();
    });
    $("#show").click(function(){
        $("p").show();
    });
});
</script>
</head>
```

```
<body>

<p>  The hide() method hides the selected elements
     The show() method in jQuery is used to display
     the hidden and selected elements.
     If you click on the "Hide" button, It will disappear
</P>

<button id="hide"> Hide </button>
<button id="show"> show </button>
</body>
</html>
```

The hide() method hides the selected elements. The show() Method in jQuery is used to display the hidden and selected elements If you click on the "Hide" button, I will disappear.

Hide Show

Hide Show

The hide() method hides the selected elements. The show() Method in jQuery is used to display the hidden and selected elements If you click on the "Hide" button, I will disappear.
